

YSOFT **SAFEQ Managed**[™]

MANAGED PRINT SERVICES

Digital Transformation. It's no longer a buzz word because organizations large and small are looking toward cloud-based solutions for business processes. Print services, like other business processes, can leverage the cloud to eliminate costly on-prem infrastructure and IT resources.

YSoft SAFEQ Managed includes powerful features to deliver robust print management and document capture as a subscription service -- completely managed and supported by Y Soft. You get the centralized print management, simplified document capture, reduced print costs and the increases in document security you need. And all print services activities come with accurate reporting to meet regulatory and budgetary requirements.

Your success is backed by Y Soft support, project management and optional companion hardware to keep your print services agile, cost-effective and user friendly.

KEY BENEFITS

ELIMINATE COSTLY INFRASTRUCTURE

No more expensive on-site servers. No more managing print drivers. Instead, imagine the time and IT resources saved that can be spent on other digital transformation initiatives. As a Cloud service, YSoft SAFEQ Managed provides the print, copy, fax and automated scan workflows on the printers you already use on a reserved infrastructure for maximum security.

IMPROVED SECURITY & DATA PRIVACY

Print services security begins with controlled access to the multifunction device (MFD). Only upon approved identify verification can a user access the MFD. And only authenticated users can release print jobs which means no print jobs are left in the output tray where they can be picked up by other employees or visitors ensuring data privacy.

VISIBILITY & CONTROL OF PRINT SERVICES

Do you know which groups are printing the most and at what cost? Which printers are most cost efficient for large B/W print jobs and which are more suitable for high quality color? With the reporting tools provided, you can make optimization decisions based on factual usage data. You can also implement print rules that enforce cost saving measures such as duplex and black/white.

NO SURPRISE COSTS

YSoft SAFEQ Managed is offered as a subscription service for each printer. There are no limitations to the number of users, and you'll know exactly what your costs for print services month to month or quarter to quarter will be. Adding or removing printers to/from the service is easy and your costs adjust accordingly.

YSOFT SAFEQ MANAGED: KEY FEATURES

YSoft SAFEQ Managed is integrated within the user interface of the world's most popular MFDs. These key features are intuitive and user friendly for end users and print administrators alike.

Feature	Benefits at-a-glance
Authentication	<ul style="list-style-type: none">• Secure access to the MFD only by authorized users• Documents remain secure until the user authenticates via card/mobile reader, PIN, username/password or any combination• Print jobs no longer needed are never printed• Easily assign usage rights to users or groups of users
Print Roaming	<ul style="list-style-type: none">• Secure pull-printing from any printer in the SAFEQ system (per data center)• Integrated with the Universal Print feature in Microsoft365
Rules-Based Engine	<ul style="list-style-type: none">• A library of common cost-reducing rules• Create your own rules to enforce governance or sustainability by creating triggers• User notifications sent when print rules have been applied• Apply watermarks for document security upon defined triggers
Reporting	<ul style="list-style-type: none">• Pre-defined or custom reports provide fact-based data and usage audits; Infinite custom reports can be created• Generated on demand or scheduled and automatically routed• Includes pre-defined templates for web reports and sustainability reports

Powerful features include image cleanup, append/pre-pend pages, blank page removal, highlight text naming.
Pay-to-print	<ul style="list-style-type: none"> Aids in managing and recovering print services costs
Extension Store	<ul style="list-style-type: none"> Access to over 50 customized capabilities and integrations with third party applications such as SAP, EPIC, and DocuWare.

HOW IT WORKS

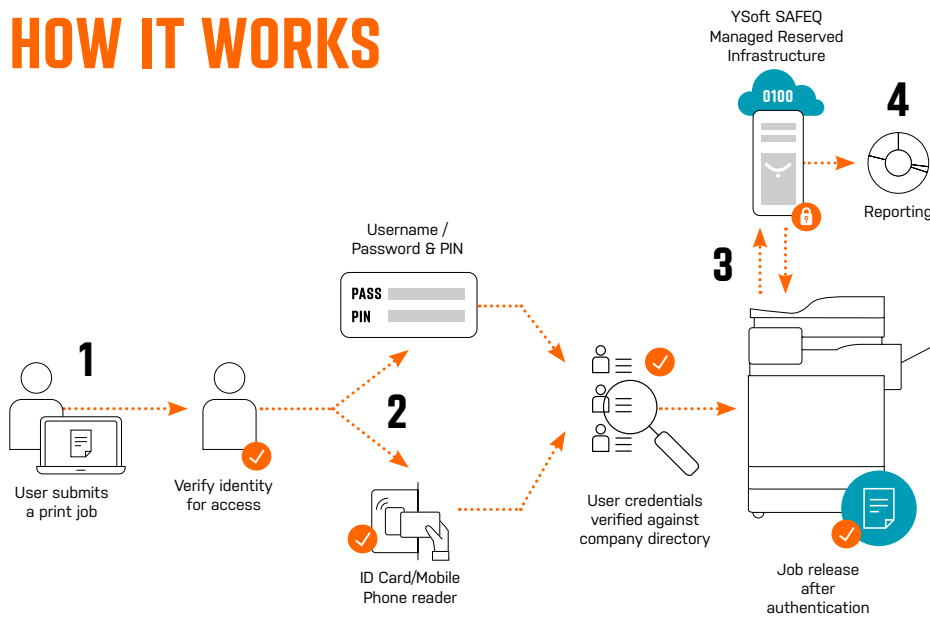

Figure 1. YSoft SAFEQ Managed Print Job Workflow

1

User submits print job as normal.

2

User authenticates at any printer for access to print/copy/scan; identity is verified against the corporate directory.

3

User chooses desired print job or all print jobs. User can mark a job as a favorite or delete print jobs submitted but no longer needed.¹ If scanning, output is automatically delivered to email.

4

Reporting captures all authentication and print, copy, scan and fax activity.

¹ Mark as favorite is available on MFDs that support this feature.

THE Y SOFT DIFFERENCE

COMPANION SOLUTIONS

Y Soft is unique as a print management provider because we offer a comprehensive solution that enhances the user experience. Y Soft designs, manufactures and quality tests all companion solutions, so you are assured that software and hardware work well together and are supported by a single supplier. In fact, many competitive print management providers also use Y Soft companion hardware.

MOBILE/CARD READERS

A quick and convenient way for staff to authenticate at the MFD is through an attached reader. The YSoft MFX Mobile reader combines a smartphone app with the reader for truly contactless authentication and print job release. Both the YSoft MFX Mobile and YSoft MFX readers also read traditional ID cards. Our free card reader service can verify compatibility with your existing access cards.

MOBILE APPS

Y Soft mobile apps can be used to authenticate staff without touching the MFD and to release their print jobs.

MULTI-VENDOR SUPPORT & SOLUTION FLEXIBILITY

YSoft SAFEQ Managed supports the world's most popular MFD brands providing a consistent experience across your print fleet. The print management application is architected with a Building Block tiered structure ensuring you have what you need in the locations you need it – with the flexibility of adding high availability features such as load balancing and redundancy for critical printing processes or customized reserved infrastructure to meet specific data resiliency requirements.

GLOBAL SUPPORT & THE GLOBAL OPERATIONAL EXCELLENCE (GOE) FRAMEWORK™

Renowned for our excellent global support, your subscription to YSoft SAFEQ Managed includes direct support with multiple options to meet your needs.

Depending upon the size and complexity of your print environment, the GOE Framework may be utilized. The GOE Framework is a proven set of processes and tools to ensure that your expected ROI is realized and that the project is delivered on time and on budget throughout the Discover, Design, Deploy stages along with ongoing support.

Contact a local Y Soft representative or your Y Soft certified MFD provider for more information.
