# SAFEQ Cloud

ELEVATE YOUR DOCUMENT HANDLING WITH SAFEQ CLOUD

Introducing SAFEQ Cloud, a native cloud print-and-scan infrastructure solution by Y Soft. Embrace innovation and elevate your office printing with a software solution that streamlines your print environment, supercharges security, and simplifies your document processes, for users and IT teams alike.

MORE THAN 30K HAPPY CUSTOMERS

> "People were begging for the solution to be up and ready to go. The people I demoed it to thought it was pretty awesome. One said 'this is easy to use, I like this! I can see this really helping the business.'"
>
> **Joe Saccente, Mars Inc.**

> "Print is no longer a headache. I would call this an invisible system, it's just there, and it just works."
>
> **Grégory Hermans, Brusafe**

> "SAFEQ Cloud has removed one of the biggest pains with multi-vendor print environments, the time required to install printers on numerous devices and update multiple print drivers."
>
> **Kim Olson, Lyngby-Taarbæk Municipality**

SAFEQ CLOUD GIVES USERS A MODERN SAAS EXPERIENCE WHEN PRINTING AND SCANNING

With everything from automated administration, immediate fulfilment, ongoing value, seamless security adherence, and high availability (when and where they need it),

SAFEQ CLOUD HAS GOT YOU COVERED

SAFEQ CLOUD HELPS YOU...
- Modernize your print infrastructure
- Accelerate your cloud journey
- Eliminate document-handling complexity
- Take the pressure off your IT department

HOW SAFEQ CLOUD PUTS AN END TO COMPLEXITY & WORRY

- Comprehensive compliance (incl. ISO-27001)
- Cloud and on-prem authentication
- Integration with leading identity providers
- Data encryption in transit and at rest
- Encrypted communication between endpoints
- Print roaming (Pull printing)
- Secured data center
- Vulnerability scanning and PEN-tests
- Designed for zero trust requirements

3S
SECURITY · SIMPLICITY · SINGULARITY

- Streamlined print and scan
- Simplified IT (with less hardware)
- Serverless printing (SaaS)
- Full-featured single driver
- Pure cloud terminals
- Location-aware printing
- Multi-brand support
- One-touch scan workflows
- Consistent user experience

Our focus on 'No Print Management' makes SAFEQ Cloud truly unique.
- Combat unnecessary IT work
- Outsource management and security
- Subscribe to a service platform
- Enable advanced workflows with minimum effort
- Access to in-depth automation
- Facilitate digital business acceleration

LET GO OF PRINT MANAGEMENT

Full-Featured Single Driver
With a full-featured single driver, your team will never have to worry about driver management.

Serverless Printing
Eliminate servers, centralize the print ecosystem, and set IT free!

Cloud Embedded Terminals
Currently, we offer pure cloud terminals for Ricoh, Konica Minolta, HP, and FujiFilm devices.

Proactive Security Protocols
"At Y Soft, we believe security must be integrated into the entire estate."
Morten Sørensen, CSO, Y Soft

Automated Workflows & Updates
"As a small IT department, the only way we could support the business' growth trajectory was to streamline processes and automate as much as we can. Everything is so much simpler now!"
John Schweighardt, CIO, Intracoastal Realty

Remote Access
Don't waste budget on getting vendors on-site, the platform can be easily managed remotely.

Flexibility
Adopt a technology solution that grows with you as your business grows or needs change.

Streamlined Subscription
Get started in no time with a solution that is simple to buy and requires no upfront investments.
