

RELEASE NOTES BUILD 98

CONTENT

1	New Features	3
2	Fixes and Improvements	4
2.1	Terminals, User Interfaces	4
2.2	Installation and Administration	4
2.3	Product extensions (or customizations)	4

1 NEW FEATURES

Devices using SNMP v3 can now be configured also with modern SHA-2-based hash methods. (SQC-8453)

YSoft SafeQ FlexiSpooler can now be used with the new YSoft Universal Print Driver that has been so far only available in SAFEQ Cloud. (SQC-8278, SQC-8460, SQC-8459, SQC-8461)

Users with YSoft SafeQ Client v3 can now use the right mouse click to export and locally store troubleshooting data. (SQC-8471)

The new SAFEQ Cloud print driver can be used with YSoft SafeQ Client v3. (SQC-8472)

Users can now use swiping to delete their print jobs in the YSoft SAFEQ Cloud mobile application. (SQC-6820, SQC-8456, SQC-8457)

2 FIXES AND IMPROVEMENTS

2.1 TERMINALS, USER INTERFACES

Ricoh SOP embedded terminal no longer locks the user when they initiate scanning multiple times in quick succession. (SBT-4775)

Combining certain fields in a custom report no longer prevents it from being downloaded. (SBT-4964)

User session is no longer timing out resulting in the user being logged out when using the Mobile Print app with iOS/iPad OS. (SBT-4911)

2.2 INSTALLATION AND ADMINISTRATION

YSoft SafeQ 6 no longer disables user accounts when Google LDAP unexpectedly stops responding. (SBT-4963)

YSoft SafeQ Flexispooler no longer loses connection with the Desktop interface when awakened from hibernation mode. (SBT-4967)

Administrators can again use the SQL console to view distCache as an attribute of CacheManager. (SBT-4767)

2.3 PRODUCT EXTENSIONS (OR CUSTOMIZATIONS)

Customers who use YSoft SafeQ extensions or customizations should contact their YSoft RSM or Customer Support Services for compatibility verification with the new Build. We recommend testing all extensions before applying a Build update into a production environment.
