

RELEASE NOTES BUILD 96

CONTENT

1	New Features	3
2	Fixes and Improvements	4
2.1	Terminals, User Interfaces	4
2.2	Installation and Administration	4
2.3	Product extensions (or customizations)	4

1 NEW FEATURES

Xerox embedded terminal can be configured to use port 5012 (HTTPS) instead of 5011 (HTTP). (SQC-8439)

PostgreSQL v16 is now supported also for scenarios when Payment System is installed on a standalone server. (SQC-8431)

The new SAFEQ Cloud print driver can be used with YSoft SafeQ Client v3. (SQC-8278)

The new SAFEQ Cloud print driver can be used when print jobs are replicated into the shared folder. (SQC-8427)

2 FIXES AND IMPROVEMENTS

2.1 TERMINALS, USER INTERFACES

CLI Device Replicator does not fail when the import contains direct queues. (SBT-4948, SBT-4940)

Sharp MFD BP models do not run out of memory after idle time, card animation was disabled to prevent that. (SBT-4913)

Card Activation Code in plaintext can be imported from CSV. (SBT-4904)

Devices in YSoft SafeQ Client v3's emergency print window are not missing location information. (SBT-4942)

YSoft SafeQ Client v3's deployed direct queues are not missing the queue name which was confusing when there are multiple direct queues per printer. (SBT-4946)

2.2 INSTALLATION AND ADMINISTRATION

Upgrade to Build 94 does not cause Spooler Controller Group Service to go into a restart loop. (SBT-4941)

Preventing possible deadlock in Desktop Interface, Flexispooler. (SBT-4930)

The Job Service configuration file now contains the right section to enable all authentication options. (SBT-4919)

2.3 PRODUCT EXTENSIONS (OR CUSTOMIZATIONS)

Customers who use YSoft SafeQ extensions or customizations should contact their YSoft RSM or Customer Support Services for compatibility verification with the new Build. We recommend testing all extensions before applying a Build update into a production environment.
