

USB CARD/ MOBILE READERS

MEET THE MOST UNIVERSAL, STRESS-TESTED USB CARD/MOBILE READERS ON THE MARKET

When you need a range of USB card/mobile wireless and contact readers that you can plug into your tech without the need for reconfiguration, only YSoft USB card/mobile readers come with a robot-stress-tested product-lifetime guarantee to help ensure you deliver 100% authentication uptime, no matter the use case. Reliable. Flexible. Future Proof.

YSoft USB card/mobile readers are a series of robust solutions, developed and built in-house in the EU, that fit your specific business needs, giving you powerful user authentication in a single range of plug-and-play products—where, when, and how you need them.

MOST UNIVERSAL READERS ON THE MARKET

Every use case is different. That's why we built the YSoft USB card/mobile readers to work with over 100 technologies worldwide, including most advanced and secure technologies like Legic Advant and HID iClass SE, so you can fit your card reader around your technology, not the other way around. Whether you need two-factor authentication, mobile access via biometric recognition or infrastructure-less mobile authentication, our products

conform to current security, technical and protocol specifications and work with any device with a USB interface to extend your device's capabilities with trusted and secure authentication. And with YSoft MFX Ultimate, you get support of all-mentioned contactless technologies in just one device, making it the most universal USB reader on the market.

HIGHLY SUPPORTED AND ROBUST SOLUTION

In business, downtime is an expense best avoided. Therefore, we develop, build, and strenuously robot-test our USB readers in-house hundreds of thousands of times, guaranteeing you 100% performance reliability. Because Y Soft is a renowned and trusted leader in this space with patented technology and over 500,000 card readers already in operation, you can leverage our global capabilities, certification, and free six-year product-lifetime warranty to achieve trusted performance, no matter the location.

FLEXIBILITY TO ADDRESS ALL YOUR AUTHENTICATION NEEDS

Work with a provider that understands your business and can provide a unique product fit to build a global solution according to your specific use case, such as physical access to buildings and machines through proper-person identification. Because USB card/mobile readers support both the latest, as well as legacy technology, you can enjoy seamless migration as you adopt newer and more secure technologies. Whatever your use case or technical requirements, leverage easy and accountable process/person tracking using both certified card and mobile authentication methods. You can also deploy it across multiple global sites for a consistent experience and 100% authentication reliability wherever it's needed.

EASY TO DEPLOY FOR FASTER TIME TO MARKET

As YSoft USB card/mobile readers have the most-needed capabilities built-in, it makes them ready to work out of the box. Although in most cases our readers are plug-and-play ready, through such technology as infrastructure-less mobile authentication, their flexibility means you can fit them easily to your specific use case to gain even faster time to market. For easy configuration with existing cards, just send your cards to us and you will receive a customized configuration card that you then simply swipe and watch as the system reconfigures itself! A handy demo briefcase is also available for you to test the full portfolio using sample cards and tags to gain a complete understanding of how each reader works and select the right solution for your needs.

Customers rely on our MP dry cabinets to store sensitive electronic components requiring extremely low humidity (<1% RH). To ensure proper component handling, access control and history logging are needed. RFID cards provide an ideal solution with maximum user comfort. As many of our customers have their own RFID cards with various technologies, Y Soft's universal reader and great support allow us to provide a solution to any customer with minimum effort.
