

RELEASE NOTES BUILD 91

CONTENT

1	Fixes and Improvements	3
1.1	Terminals, User Interfaces	3
1.2	Installation and Administration	3
1.3	Security Mitigation and Enhancements	3
1.4	Other included change codes	3

1 FIXES AND IMPROVEMENTS

1.1 TERMINALS, USER INTERFACES

PDFs with complex features submitted via the Mobile App can now be printed without errors. (SQC-8366)

Card authentication no longer fails on HP devices where the authentication agent ID was changed. (SBT-4786)

An error is no longer displayed after a successful login to the FUJIFILM BI Embedded Terminal. (SBT-4822)

On Ricoh devices, the user receives correct information and error message when the device hard drive is full and cannot process additional documents. (SBT-4651)

Fixed print job replication and processing when a spooler is offline when using FlexiSpooler and JobStore configuration features. (SBT-4739)

Workflow reordering no longer has the limitation of 256 scan workflows. (SBT-4819)

1.2 INSTALLATION AND ADMINISTRATION

The Rule-Based Engine no longer fails to trigger rule action if a job was submitted to a secure print queue. (SBT-4278)

The upgrade of the Spooler Controller no longer causes loss of custom certificates held in Truststore and Keystore. (SBT-4825)

Added a message in the management interface alerting the administrator when the Management Service requires a restart in specific circumstances. (SBT-4838)

1.3 SECURITY MITIGATION AND ENHANCEMENTS

Upgraded PostgreSQL JDBC Driver to address security vulnerabilities. (SBT-4794)

1.4 OTHER INCLUDED CHANGE CODES

SQC-8306, SQC-8373
