

RELEASE NOTES BUILD 92

CONTENT

1	Fixes and Improvements	3
1.1	Terminals, User Interfaces	3
1.2	Installation and Administration	3
1.3	Security Mitigation and Enhancements	3
1.4	Other included change codes	3
1.5	Product extensions (or customizations)	4

1 FIXES AND IMPROVEMENTS

1.1 TERMINALS, USER INTERFACES

Ricoh G2 device customers can now enforce quota limits when their limit is reached. (SQC-7448)

The Ricoh PIN code authentication certificate warning is no longer displayed after authentication. (SQC-8199)

Scans are now delivered on Ricoh devices when a user input field contains <>& characters. (SBT-4662)

Users can print photos from the Android Gallery correctly via the YSoft SafeQ 6 Mobile App. (SBT-4805)

Offline Print is now working properly if the PC is turned on or restarted without connection to Spooler Controller. (SBT-4817)

Scans are now delivered to the previously used destination on Ricoh devices. (SBT-4842)

The issue causing Ricoh devices to become unresponsive and requiring a hard reboot is now fixed. (SBT-4449)

On Ricoh devices, users can now send scanned documents when reaching the HDD limit error without abandoning their print job. (SBT-4651)

The preview when printing booklets using the Konica Minolta universal print driver is now fixed. (SBT-4811)

The localization of the error detail language display on Konica Minolta IWA devices is now fixed. (SBT-4837)

After YSoft SafeQ Client v3 uninstallation, direct print queues are correctly removed. (SBT-4821)

1.2 INSTALLATION AND ADMINISTRATION

The LDAP synchronization no longer prevents deleting users from a deleted domain. (SBT-4818)

The LDAP synchronization with Google no longer fails with user profiles with undefined Cost Centre. (SBT-4851)

1.3 SECURITY MITIGATION AND ENHANCEMENTS

Updated the certificate generator tool with security updates. (SBT-4836)

1.4 OTHER INCLUDED CHANGE CODES

SBT-4846, SBT-4773, SBT-4815, SBT-4849, SBT-4863

1.5 PRODUCT EXTENSIONS (OR CUSTOMIZATIONS)

Customers who use YSoft SafeQ extensions or customizations should contact their YSoft RSM or Customer Support Services for compatibility verification with the new Build. We recommend testing all extensions before applying a Build update into a production environment.

You can find additional information on Partner Portal: <https://portal.ysoft.com/products/ysoft-safeq/extension-store/print-job-extension>
